w/Vite.  
Tools: Prettier, Es-Lint, VsCode,  
Typescript, and Git/Github.

### Next.js - v13 (experimental app)

### Prisma

### Git/Github

**Familiarity with:** MongoDB,  
Firebase, Railway, Supabase.

## Projects

---

**OUR PLANET EARTH** – Personal Project - <https://ourplanetearth.eco> 2022-Present

- Utilized **Next.js** framework along with its routing system to make fast and responsive blog pages.
- Implemented markdown files that get turned into static web pages at build time.
- Used **Tailwind** framework for the styling of the web pages. I also used **React-Icons** and **Dayjs** for styling pages.
- Implemented a category querying system using the markdown files category tag.
- Implemented a search input system that allows viewers to search for articles using keywords.
- Future implementation of feedback form and more interactivity.

**GAMECENTER E-COMMERCE** – Personal Project - <https://gamecenter-ecommerce.vercel.app> 2023-Present

- Utilized **Next.js v13 w/ experimental app directory** to make an E-Commerce Website.
- Implemented a login system using **NextAuth**. Only can login through google authentication (want to expand later).
- Used **Tailwind** framework to style the website. In addition, used **DaisyUI**, **Lottiefiles**, **Framer-Motion**, and **Stripe**.
- Implemented a checkout process using **Stripe** and stripes built in product database.

**AIRBNB CLONE** – Personal Project – <https://rent-homes-website.vercel.app> 2023-Present

- Utilized **Next.js v13 w/ experimental app directory** to make an Airbnb clone (community listing website).
- Implemented Register and Login functionality with **NextAuth** and hashed password with **Bcrypt**.
- Used **Tailwind** to style the web pages. In addition, used **React-Icons**, **React-Spinners**, **Date-fns**, **Toast**, and **Leaflet**.
- Used **Zustand** as state management for opening and closing modals throughout the project.
- Utilized **Mongodb** with **Prisma** for my database.

## Work Experience

---

**OPERATIONS MANAGER – BEST BUY** 2018 - 2022

- Supervised the day-to-day daily tasks of operations throughout the store.
- Managed a diverse team with unloading and loading trucks.
- Hired, trained, and set the team culture within the warehouse.
- Provided excellent customer service while still completing tasks on time.
- Provided support to all departments in troubleshooting problems.
- Worked in warehouse dealing with receiving, distributing, and locating merchandise for customers, employees, and third-parties.
